This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

MARTIN B. BROWN
PRESS
NEW YORK

The following tentative list has been compiled from the records of the departments, supplemented by a thorough canvass of the Borough of Man not expected that the list is free from errors and omissions, for in m the data secured were not only incomplete but very vague and uncertai works of art themselves do not in all instances bear the names of the ar of completion. In a number of instances, owing to the changes and alt have been made, the name of the artist has partially or wholly been ob the authorship is consequently open to question. The list is, however, as the material at hand at present will permit, and if those into whose come shall be able to supply the deficiencies and correct such errors as r ably have crept in, it will be appreciated not only by the Commission who are constantly applying at this office for information regarding t works.

In determining whether a painting, sculpture or structure is a wor definition used in the Charter in defining the powers of the Art Cor liberally been construed. Section 637 provides: "The term 'work of ar this title, shall apply to and include all paintings, mural decorations, s statues, bas-reliefs, or other sculptures, monuments, fountains, arches or tures of a permanent character intended for ornament or commemoration.'

All inscriptions have been copied verbatim, without attempting to errors, if any, contained therein. Where it has been possible to decipher of the artist, this has been indicated by the use of quotation marks. Whe name is not inclosed in quotation marks, it is to be understood, therefor there is no signature or that the signature is in doubt. The asterisk (* indicate the fact of official approval by the Art Commission, before a the City. The items are classified first alphabetically and again geog facilitate easy reference.

To provide a correct record of the location of all works of art, maps of the entire City have been prepared, mounted and placed in the office of the Commission. The location of every work of art and structure approved by the Commission has been plotted. A system of notation has also been adopted which shows at a glance whether the designs and location of a work of art or a public structure have been approved in whole or in part, or have not been passed upon by the Commission. A number has been assigned to each structure and a card catalogue prepared which enables one to find in a moment all of the data in the records of the Commission or its files relating to it. The system is capable of indefinite expansion, and as matters are acted upon by the Commission, the records will be extended so that the catalogue and index will be kept up to date from month to month.

Thou ling'ring star, with less'ning ray,
That lov'st to greet the early morn,
Again thou usher'st in the day
My Mary from my soul was torn.
O Mary! dear departed shade!
Where is thy place of blissful rest?
See'st thou thy lover lowly laid?
Hear'st thou the groans that rend his breast?
That sacred hour can I forget,
Can I forget the hallowed grave
Where by the winding Ayr we met,
Darling love?
